

# FIRE PIT SET UP INSTRUCTIONS

## Contents of Fire Pit Box

Check to be sure that you have all parts listed below:

- A. Fire Pit Base
- B. Stainless Steel Burner
- C. Orifice and lock nut
- D. Connector Hose—24"
- E. Complete Valve ready to connect to gas hoses
- F. Gas Regulator with Hose—60"
- G. Lava Rock—1 Bag

See page 2 for diagrams

## Set Up Instructions

1. Place your Fire Pit on level ground.
2. Lifting up your Fire Pit, attach the 60" hose to the Valve assembly located in the inside of your Fire Pit. **Note: The end with the Regulator (Black) will be outside the bottom of your Fire Pit extending from the underside of the Fire Pit.**
3. Placing the Fire Pit back in a level position, attach the 24" connector hose to the top side of the Valve assembly.
4. The brass Orifice is attached to the Stainless Steel Burner with the use of the enclosed lock nut. The orifice is attached at the end of the venturi extruding from the bottom of the Stainless Steel Burner
5. Attach the 24" connector hose now connected to the valve assembly to the end of the brass orifice and place stainless burner into the top of the Fire Pit. **Note: Be sure that all fittings are secure and will not result in any leaks.**
6. Open the bag of Lava Rock and spread evenly over the complete stainless steel burner surface.
7. Connect the Regulator to a propane gas tank. **Note: The propane tank cannot be stored in the base of your Fire Pit.**
8. Open your propane gas. **Note: Be sure that the valve in your Fire Pit is in the Off position prior to opening your propane gas.** Then, using the key supplied turn the gas on **slowly** and ignite using a butane lighter or long fireplace match, after ignition adjust the flame to the desired height

## SAFETY FIRST!

- ***Do not operate indoors or in any enclosed location***
- ***This product is for outdoor use only***
- ***This product is for propane use only. If you wish to use Natural Gas contact your dealer for the conversion.***
- ***If you smell gas, immediately shut the fire pit off and test your gas line connections. If you continue to smell gas call your dealer.***
